[your organisation]

I/We recognise the importance of Social Capital and Purposefulness in supporting healthier, vibrant and resilient communities.

We strive to enable our communities to better know each other, be more mutually tolerant, and have a greater sense of communal identity.

We will endeavour to understand how we create Social Capital and Purposefulness through our actions, relationships and responses to our environment.

We will act to build greater connectivity, capacity and confidence within our communities.

We support the beliefs and values within our communities of:

1. Think win-win-win - i.e., what is good for ourselves, the other party and contributes to a wider good
2. Consider everyone is an asset
3. Do things for the common good and shared purpose
4. Value people contact
5. Act local. Act small. Act now
